

Collision Protection Bars

Collision Protection bars can also be used to protect shelving and wall mounted equipment such as instruments, switch cabinets, first aid equipment etc. Due to their low profile they allow easy pedestrian access to protected areas.

Manufactured from high quality seamless steel tube 45 Degree tapered ends and strong fixing plates 10mm thick.

TECHNICAL SPECIFICATIONS

- 76mm diameter
- 3mm wall thickness
- Base Plate: 130mm x 70mm x 10mm

Available in galva painted & finished in RAL 1021 and RAL 1021 with black warning stripes.

Mounted on base plates or root-fixed.
