

Lubin seat

The Lublin seat is described as an elegant and robust bench designed for ultimate seating comfort, especially suitable for parks and public gardens.

Here are the technical features outlined:

Dimensions

Seat Length: 2000 mm

Other

Structure:

The structure of the bench is made of cast steel.

The cast steel is zinc-primed and painted. The available finishes for the paint are black or metallic grey, adding an extra touch of elegance.

Seat and Back:

The seat and back of the bench are made of exotic hardwood slats. The slats are 40 millimeters deep.

Two finish options are mentioned: light oak or mahogany stain finish.

Installation:

The bench is installed on base plates for stability.

Additional Feature:

Three stainless steel rods are placed at the rear of the bench to keep it straight. This feature adds structural support and ensures the bench maintains its shape.
