

FOLD DOWN KEY OPERATED POSTS

How do I stop people reversing on my driveway?

How do I stop unauthorised people parking in my space?

Well, we at Aremco Barriers have the answer.

Our Folding Parking Post is probably one of the cheapest on the market. **These are an absolute bargain!**

This Push lock Lockable Folding Parking Post folds down so, is therefore ideal for reserving individual car parking spaces. It can also be used as a visual deterrent to restrict access into driveways. It can be locked in both the upright and down positions.

Overall height of Post 610mm

The floor mounted base is secured using 4 No. M10 x 85mm Through Bolts to a prepared concrete foundation and are supplied with the post along with 2 No. Keys.

Can be locked in the down or upright position.

The floor mounted base is secured to a prepared concrete foundation by 4 No. M10 x 85mm Through Bolts and this base is manufactured from cast iron.

This folding post is ideal for use on driveways where vehicles are parked outside of the property. Installing access prevention bollards or posts will help to protect your vehicles from being targeted. This is an inexpensive way to protect your driveway and deter would be thieves.

In comparison to the cost of your vehicle and the disruption a theft may cause, security measures are a small price to pay.

It is crucial to protect your driveway, especially if you have expensive vehicles parked outside your property. Installing access prevention bollards or posts will help to protect your vehicles from being targeted.

Having a garage does also assist with the prevention of vehicular theft, but by adding a post in front of this will give even better protection.

If your driveway is open and vehicles are parked, thieves may well target your property and attempt to steal parked vehicles.

This is one our most popular folding parking posts. If you are looking for a great value parking post, then this is a great buy!

Should you require this post to be set in either Tarmac or Block Paving, then the M10 Through Bolts will be unsuitable, has any would be thief can quite easily remove the post by pulling from these surfaces and taking away with the post part of the groundwork.

We do however offer a solution to this, it is called a Build in Base and this just needs to be concreted into the ground, thus preventing the removal of the post and groundwork.

These must be installed on your own driveway and not onto public highways, roads, etc.
